**Subject:** Your Submission BJMI-D-25-01059R2

Dear MSc. Neves,

We are pleased to inform you that your manuscript, "Streptomyces amazonensis sp. nov. isolated from Madeira River sediments with genomic potential for secondary metabolite production", has been accepted for publication in Brazilian Journal of Microbiology.

You will receive an e-mail in due course regarding the production process.

"This journal is undergoing adjustment to the presentation of publications. While peer review decisions will be given within normal timeframes, publication may be delayed due to technical transitions. "

Please remember to quote the manuscript number, BJMI-D-25-01059R2, whenever inquiring about your manuscript.

With kind regards,  
Luiz Henrique Rosa, PhD  
Editor in Chief  
Brazilian Journal of Microbiology

Comments to the author (if any):  
Reviewer #6: Dear authors,

I thank you once again for the opportunity of participating in the revision of the manuscript BJMI-D-25-01059R2.

After careful reading, I have concluded that the revised version of the manuscript is well written and have adequately addressed the previous suggestions raised.

I identified only a minor issue that requires correction for the final version of the manuscript: In the authors' affiliations, the numbering jumps from affiliation 3 directly to affiliation 5, with affiliation 4 missing.

Aside from this minor point, I have no further comments, and I consider the manuscript suitable for publication in its current form after this minor correction.

Sincerely,  
Matheus Uchoa Oliveira

Authors may need to take specific actions to achieve compliance with funder and institutional open access mandates. If your research is supported by a funder that requires immediate open access (e.g. according to Plan S principles (<https://www.springernature.com/gp/open-science/plan-s-compliance>) or the NIH public access policy (<https://www.springernature.com/gp/open-science/us-federal-agency-compliance>)) then you should select the gold OA route, and we will direct you to the compliant route where possible. Because authors warrant under our subscription licensing terms that they haven't committed to licensing any version of their article under a licence inconsistent with the terms of our agreement - including the applicable embargo period - publication under the subscription model isn't suitable for authors whose funders require no embargo.
